Reasons For Allowance

1. This Office Action is made in response to applicant's amendment filed on 11/28/2005. Claims 1-18 are currently pending in the application. An action follows below:

Response to Arguments

2. The Applicant's amendments to the objected claims to standardize the presentation of the mathematical equations in the claims with the terms used in the specification are acceptable and the objections are withdrawn.

3. Applicant's arguments, see pages 13 and 14, filed 11/28/2005, with respect to claims 1 and 8 have been fully considered and are persuasive. The rejection of claims 1 and 8 under 35 USC 112 2nd paragraph has been withdrawn in light of the amendments to the claims.

Allowable Subject Matter

4. Claims 1-18 are allowed.

The following is an examiner's statement of reasons for allowance:

The present invention is directed to a liquid crystal display with a gray level switching system to optimize the driving voltages used to change a pixel from one level of gray to a second level of gray. Each independent claim identifies the uniquely distinct features "determining an optimized driving voltage $V_d(t)$, according to an equation $V_d(t)=V_o(t-1)+ODV$ " and "determining an dynamic gray level data $G_d(n)$ according to an equation $V_d(t) = a \times G_d(t)^3 + b \times G_d(t)^2 + c \times G_d(t) + d$ ". The closest prior art, Usui et al. (USPN: 5347294) and Lee et al. (USPgPub: 2004/0189568) disclose methods of driving

liquid crystal displays and providing correction voltages to change display characteristics, but lack the specific equations used by the applicant, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
